

To Whom It May Concern

I was originally involved in the Veet Scheme in Victoria with Pool Pumps through Go Green Be Green P/L and remain as an active participant. Although due to ill health have not participated at all with the scheme. In my opinion the Veet scheme would be the standard the government should consider firstly, the complete and thorough professionalism of the people involved in Victoria was of the highest standard

I would very much like to be involved in the scheme should it progress, I was also involved in the Nsw Ngacs scheme and the Green Home scheme under the Rudd government which ended abruptly several years ago.
